Agricultural Statistics

1989

91-03128/

On the front cover

The front cover shows an outline map of Saskatchewan indicating the nine crop districts and three soil zones. Much of the crop and livestock production data in the handbook is presented by crop district. The soil zone demarcation shows the variation in growing conditions in Saskatchewan.

As most of Saskatchewan's soil is predominantly of loamy texture, production capabilities are determined largely by weather conditions and the presence of organic matter. The brown soil zone covers 21.0 million acres in southwest Saskatchewan. The relatively warm temperatures, lack of moisture and lack of organic matter in this arid region limit crops to small grains and the use of grassland for livestock production.

The dark brown soil zone, covering 18.3 million acres, lies north and east of the brown zone. A small area, with the characteristic cooler temperatures and more moisture, is also evident around the Cypress Hills in southwest Saskatchewan.

The black soil zone covers 26.4 million acres in the north and east of the agricultural area. The growing period is shorter but the lower temperatures and increased moisture allow for a wider variety of cropping practices.

FOREWORD

Agricultural Statistics is a handbook containing Saskatchewan agricultural statistics. Agricultural Statistics 1989 is our fourteenth statistical handbook and includes the latest statistics on the agricultural financial situation, crops, livestock and weather and climate.

Sources of the information contained in this handbook include Statistics Canada, Agriculture Canada, Canada Grains Council, Canadian Wheat Board, Canadian Grain Commission, Environment Canada, Farm Credit Corporation, Manitoba Department of Agriculture, Saskatchewan Crop Insurance Corporation, Agricultural Credit Corporation of Saskatchewan, Saskatchewan Water Corporation, Saskatchewan Pork Producers Marketing Board, Saskatchewan Sheep and Wool Marketing Commission, Saskatchewan Beef Stabilization Board, Saskatchewan Milk Control Board, Saskatchewan Turkey Producers Marketing Board, Saskatchewan Chicken Marketing Board, Saskatchewan Commercial Egg Producers Marketing Board, Natural Products Marketing Council, Saskatchewan Bureau of Statistics, Saskatchewan Economic Diversification and Trade and the Branches of Saskatchewan Agriculture and Food.

We hope the handbook will be useful to agriculture's decision-makers--producers, agribusiness, government. We welcome suggestions for changes and improvements. If you have any comments or enquiries, please contact:

36. Winter Wheat Acreage, Yield and Production, by Crop District, 1981-89.... 46
37. Spring Wheat Acreage, Yield and Production, by Crop District, 1980-89.... 50
38. Durum Acreage, Yield and Production, by Crop District, 1980-89........... 54
39. Oats Acreage, Yield and Production, by Crop District, 1980-89............ 58
40. Barley Acreage, Yield and Production, by Crop District, 1980-89.......... 62
41. Rye Acreage, Yield and Production, by Crop District, 1980-89............. 66
42. Flaxseed Acreage, Yield and Production, by Crop District, 1980-89........ 70
43. Canola Acreage, Yield and Production, by Crop District, 1980-89.......... 74
44. Ten-Year Average Yields, Saskatchewan, by Rural Municipality, 1980-89.... 78
45. Area, Yield, Production of Specialty Crops, Saskatchewan, 1988-89........ 84
46. Specialty Crops Area Seeded, Saskatchewan, 1971-89....................... 84
47. Specialty Crops Yields, Saskatchewan, 1971-89............................ 85
48. Specialty Crops Prices, Saskatchewan, 1971-89............................ 85
49. Forage Seed Production, Saskatchewan, 1980-89............................ 86
50. Wild Rice Acreage, Production and Value, Saskatchewan, 1975-89........... 87
51. Average Dates of Seeding and Harvesting Operations for Spring Wheat, Saskatchewan, 1952-89.. 88
52. Average Protein Content of Hard Spring Wheat, Saskatchewan, by Crop District, 1985-89.. 89
53. Spring Wheat Grades, Saskatchewan, 1980-89............................... 89
54. Grades of Grains and Oilseeds, Saskatchewan, 1988-89..................... 90
55. Spring Wheat Grades, Saskatchewan, by Crop District, 1989................ 90
56. Stocks of Crops on Farms, Saskatchewan, July 31, 1960-89................. 91
57. Farm Supply and Disposition of Major Crops, Saskatchewan, Crop Years 1985-86 to 1988-89... 92
58. Canadian Wheat Board Payments for Wheat and Durum, Basis in Store Thunder Bay, Crop Years 1971-72 to 1989-90............................. 93
59. Canadian Wheat Board Payments for Oats, Basis in Store Thunder Bay, Crop Years 1971-72 to 1988-89... 94
60. Canadian Wheat Board Payments for Barley, Basis in Store Thunder Bay, Crop Years 1971-72 to 1989-90............................. 95
61. Average Canadian Wheat Board Selling Quotations, Basis in Store Thunder Bay, Crop Years 1974-75 to 1988-89............................. 96
62. Average Saskatchewan Wheat Pool Street Price Quotations, Crop Years 1974-75 to 1988-89... 96
63. Canadian Wheat Board Prices, Basis Thunder Bay, Crop Years 1988-89 and 1989-90.. 97
64. Primary Elevator Handling Charges, Saskatchewan Wheat Pool, Crop Years 1981-82 to 1989-90... 98
65. Grain and Oilseed Freight Rates, from Saskatoon, Crop Years 1981-82 to 1989-90... 99
66. Number and Capacity of Licensed Primary Elevators, Saskatchewan and Prairies, August 1, 1971-89....................................... 99
67. Canadian Wheat Board Cash Advances to Producers, Prairie Provinces, Crop Years 1957-58 to 1988-89..100
68. Western Grain Stabilization Program, 1976 to 1988-89......................101
69. Saskatchewan Crop Insurance Program, Crop Years 1961-62 to 1988-89.......102

LIVESTOCK AND POULTRY

70. Livestock on Farms, Saskatchewan, June 1, 1916-73, July 1, 1974-89...... 103
71. Average Livestock Prices, Saskatchewan, 1931-89...........................105
72. Livestock Marketed, Saskatchewan, 1976-89................................106
73. Cattle on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-89..........107

74. Cattle on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and July 1, 1989....108
75. Cattle on Farms, Saskatchewan, December 1, 1941-72, January 1, 1974-90...111
76. Origin of Cattle Marketed, Saskatchewan, by Crop District, 1988-89.......112
77. Destination of Saskatchewan Cattle Marketed, 1985-89....113
78. Monthly Average Saskatchewan Beef Stabilization Board A1,2 Steer Price, 1985-89....113
79. Saskatchewan Cattle Prices, 1985-89....114
80. Pigs on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-89, December 1, 1932-72, January 1, 1974-90....115
81. Pigs on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and July 1, 1989....117
82. Pigs Marketed through Saskatchewan Pork Producers Marketing Board by Size of Producer Marketings, 1985-89....118
83. Origin of Pigs Marketed through Saskatchewan Pork Producers Marketing Board, by Crop District, 1985-89....119
84. Destination of Pigs Marketed through Saskatchewan Pork Producers Marketing Board, 1985-89....119
85. Index of Pigs Marketed through Saskatchewan Pork Producers Marketing Board, 1985-89....120
86. Monthly Average Index 100 Hog Price, Saskatchewan, 1987-89....121
87. Hog-Barley Ratio, Winnipeg, by Month, 1971-89....121
88. Sheep on Farms, Saskatchewan, June 1, 1932-73, July 1, 1974-89, December 1, 1940-72, January 1, 1974-90....122
89. Sheep and Lambs Marketed by the Saskatchewan Sheep and Wool Marketing Commission, 1975-89....123
90. Sheep on Farms, Saskatchewan, by Crop District, June 3, 1981 and 1986 and July 1, 1989....124
91. Average Monthly Heavy Lamb Price, Saskatchewan, 1985-89....125
92. Production, Value and Disposition of Shorn Wool (Greasy Basis), Saskatchewan, 1980-89....125
93. Farm Sales of Milk and Cream, Saskatchewan, 1980-89....126
94. Cash Receipts from Sales of Milk and Cream, Saskatchewan, 1980-89........126
95. Saskatchewan Farm Cream Sales, 1972-89....126
96. Saskatchewan Milk Production and Value, 1971-89....127
97. Saskatchewan Milk Production by Control Area, 1985-89....127
98. Saskatchewan Milk Sales, 1971-89....128
99. Average Milk Pool Producer Price, Saskatchewan, 1971-89....128
100. Average Monthly Group I Milk Pool Producer Price, Saskatchewan, 1985-89..129
101. Chickens and Turkeys Placed in Saskatchewan, 1985-89....130
102. Fowl and Chicken Production, Saskatchewan, 1971-89....130
103. Turkey Production, Value and Disposition, Saskatchewan, 1971-89..........131
104. Hatchery Production, Saskatchewan, 1985-89....131
105. Poultry Marketings Through Registered Processing Stations, Saskatchewan, 1985-89....131
106. Interprovincial Movement of Chicks, Poults and Eggs, 1988-89.............132
107. Registered Chicken Production and Value, Saskatchewan, 1971-89...........132
108. Distribution of Registered Chicken Quota Holdings at January 1, Saskatchewan, 1986-90....133
109. Registered Chicken Marketings by Class, Saskatchewan, 1985-89............133
110. Saskatchewan Chicken Marketing Board Prices, Live, F.O.B. Farm, 1986-89..134
111. Registered Turkey Production and Value, Saskatchewan, 1971-89............135
112. Registered Turkey Marketings by Class, Saskatchewan, 1985-89.............135
113. Destination of Registered Turkey Marketings, Saskatchewan, 1985-89.......136
114. Saskatchewan Turkey Producers Marketing Board Prices, Live No. 1, F.O.B. Farm, 1985-89....136

115. Egg Production and Disposition, Saskatchewan, 1971-89....................137
116. Registered Egg Production and Value, Saskatchewan, 1975-89...............138
117. Distribution of Registered Egg Quota Holdings at January 1, Saskatchewan, 1985-89..138
118. Monthly Average Egg Price (Grade A Large) to Producers, Saskatchewan, 1985-89..139
119. Honey and Beeswax Production, Saskatchewan, 1971-89......................140
120. Saskatchewan Livestock Stabilization Programs, Year Ending March 31, 1977-89..141

January

3 - the Advisory Committee to the Canadian Wheat Board (C.W.B.) adopted the revised report of the Quota Review Committee. The **quota review** report was released in February 1988, discussed at C.W.B. district meetings and referred back to the Committee for refinement in April 1988.

5 - the U.S. National Pork Producers Council filed a petition with the U.S. International Trade Commission (I.T.C.) and U.S. Commerce Department asking for countervailing **import duties** against Canadian pork products. The I.T.C. launched an investigation January 26, 1989, made a preliminary determination on February 15, 1989 that there was a reasonable indication of injury or threat of injury and announced February 20, 1989 an investigation by the Commerce Department. The Commerce Department announced May 2, 1989 a preliminary decision that pork imports from Canada were subsidized and should be subject to a countervailing duty of 3.5 cents per pound. A final determination, announced July 18, 1989, imposed a 3.6 cent per pound duty on Canadian pork products. On August 28, 1989 the I.T.C. upheld the duty. Federal Trade Minister John Crosbie said the case would be appealed under the Canada/U.S. Trade Agreement and that Canada would formally request consultations with the U.S. under the General Agreement on Tariff and Trade (GATT).

- Federal Agriculture Minister Don Mazankowski, Western Diversification Minister Bill McKnight, Delsa Foods president Syd Hill and Herb Swan, minister responsible for Saskatchewan Water Corporation announced the construction of **a salad processing plant** at Delisle. The plant was officially opened June 14, 1989.

12 - Saskatchewan minister responsible for the Saskatchewan Water Corporation Herb Swan announced an extension of the 1988 **water supply assistance** programs to ensure that applicants could complete approved work. Additional funds were allocated to water supply programs in 1988 to address farm and rural water supply shortages.

19 - Federal Grains and Oilseeds Minister Charles Mayer announced that effective August 1, 1989 **oats** would not be handled by the Canadian Wheat Board but all marketing would be handled by individuals and private traders.

25 - the National Tripartite Lamb Stabilization Committee announced a **lamb stabilization** payment of $12.59 per lamb for the September-November 1988 program period.

- **B.C. Pea Growers Ltd.** announced construction of a $390 thousand dry-pea cleaning and splitting plant at Rowatt.

27 - Saskatchewan minister responsible for Saskatchewan Crop Insurance Corporation Neal Hardy announced details of the **Livestock Feed Insurance Program.** The program was developed as a result of the 1988 drought to provide coverage on a per acre or per animal unit basis.

27 - the National Tripartite Beef Stabilization Committee announced a **slaughter cattle stabilization** payment of $87.92 per head for the October-December 1988 program period and a **feeder cattle stabilization** payment of $38.56 per head. The Committee also announced that no payment would be made under the **cow-calf** program for 1988.

- the National Tripartite Hog Stabilization Committee announced a **hog stabilization** payment of $37.08 per hog for the October-December 1988 program period.

- the new year began with below normal **temperatures** but above normal temperatures for most of the month resulted in January temperatures averaging 3 to 6 degrees above normal. Daytime highs above 0°C were recorded on a few days at mid-month and throughout the fourth week. By the 31st temperatures dropped well below normal beginning an intense cold period which lasted until February 3. Normal January highs range from -12°C to -15°C while normal lows are in the range of -20°C to -25°C. January **snowfall** was below normal for most of agricultural Saskatchewan while numerous days of light snow during the first half of the month resulted in above normal accumulated precipitation across the south. A severe storm moved into the province from Alberta at mid-month but with the exception of isolated western locations little new snow occurred. With the above freezing temperatures, the storm included rain. By month-end, most of the province had at least 8 to 10 cm of snow with western and eastern locations measuring snow depth in excess of 20 cm. Excepting the odd isolated location, such as North Battleford, the area north of the Trans-Canada highway was rated dry and in need of snow.

February

1 - Federal Agriculture Minister Don Mazankowski announced that the target price for **industrial milk** would be maintained at $47.06/hl for the remainder of the 1988-89 dairy year (August 1 - July 31).

2 - Saskatchewan Deputy Premier Eric Berntson announced that the provincial government agreed in principle to the signing of the Canada-Saskatchewan Soil and Water Conservation and Development Accord and the Canada-Saskatchewan Soil Conservation Agreement. A three-year $54 million agreement allowing for implementation of **soil conservation** programs was signed July 25, 1989. The first program under the Agreement, the Permanent Cover Program was announced August 29, 1989 and the Save Our Soils program was announced October 18, 1989.

- **hog stabilization** payments totalling $1.17 million were mailed to participants of the Saskatchewan Hog Assured Returns Program for the October-December 1988 program period.

9 - Federal Agriculture Minister Don Mazankowski announced federal/provincial/producer agreement on **amendments** to the national **tripartite** plans for hogs, sheep and cattle. The agreement included a cap on government benefits to each sector, special provision allowing for producer enrolment and a bridging agreement to phase over from provincial to tripartite beef stabilization. Sherwin Petersen Saskatchewan M.L.A. and legislative secretary to Premier Grant Devine announced February 10, 1989 that Saskatchewan signed the new agreement. Saskatchewan Premier Grant Devine announced February 28, 1989 details of the phase-over process from the provincial plan to the national

plan. Producers who joined the tripartite beef plan by the April 29, 1989 entry date would receive coverage from October 1, 1988. Premier Devine announced September 15, 1989 that the Saskatchewan Feeder to Finish Market Insurance Program would be terminated effective October 1, 1989 and that the Cow/Calf to Finish Market Insurance Program would terminate March 31, 1990. The termination of the programs was made to facilitate participation in the National Tripartite Beef Stabilization Program.

27 - Farm Credit Corporation announced that the **interest rate** on Shared Risk Mortgages approved after February 26, 1989 would increase to 13.0% from 12.5%. Interest rates for other loans remained unchanged at 12.5% for 5-year and 12.75% for 10 and 15-year fixed term.

28 - Saskatchewan Premier Grant Devine announced that, as a result of the annual review, the levy under the Saskatchewan Beef Stabilization **Feeder-Finish Market Insurance Program** would increase to 4 per cent and that the support level would decrease from 95% to 93% of costs effective April 1, 1989.

- **cattle stabilization** payments totalling $10.74 million were mailed to participants of the Saskatchewan Beef Market Insurance Programs for the October-December 1988 program period.

- extremely cold **temperatures** and high wind chills dominated the weather during February. **Temperatures** dropped to well below normal (15 to 20 degrees) to the -40°C range at the end of January and remained very cold throughout the first week of February. While temperatures were near normal most of the remaining days, a week-long cold spell of ten degrees below normal was recorded at mid-month. Above freezing daytime highs were recorded on the 23rd and 24th. Average temperatures for the month were 2 to 3 degrees below normal across northern and eastern locations but were 4 to 7 degrees below normal for the rest of the province. Across most of Saskatchewan's agricultural region, February **snowfall** was one-third to one-half of normal. In the extreme southwest where snow was received early in the month, accumulations were above normal. By month-end, snow cover ranged from near nil in west central Saskatchewan to 30 cm in the southwest. Most of the province had 10 to 20 cm of snow cover.

March

2 - the Canadian Wheat Board announced changes to **quota policy** for rye, flax and canola delivered to processors. Effective August 1, 1989, deliveries for processing would be exempt from quota but would still be required to be recorded in the producer's permit book.

3 - the Canadian Wheat Board announced producers would be able to deliver rye, flax and canola under special **production contracts** in 1989-90. Producers could assign one quota acre for each tonne contracted with grain companies.

- Federal Agriculture Minister Don Mazankowski and Grains and Oilseeds Minister Charles Mayer announced interim payments under the **Canadian Crop Drought Assistance Program** (CCDAP). Producers in moderate and severe drought areas received payments of $7.00 and $12.00 per cropped acre, respectively. Final payments to producers in these areas as well as to those less affected by the 1988 drought conditions were made during the summer of 1989. The CCDAP was announced in November 1988 to compensate producers for losses due to the 1988 drought. Payments to Saskatchewan producers totalled $444 million.

8 - Saskatchewan Lieutenant-Governor Sylvia Fedoruk read the **Throne Speech** opening the Third Session of the Twenty-First Saskatchewan Legislature. Highlights included the establishment of the Department of Agriculture and Food, the introduction of the Farm Finance Act to consolidate farm financing options, expansion of the mandate of the Agricultural Credit Corporation of Saskatchewan to provide loans to purchase home quarters and re-establish viable farm operations and legislation to facilitate creation of the Grasslands National Park.

9 - Grains and Oilseeds Minister Charles Mayer announced 1988-89 **initial payment** increases for durum. Initial payments were raised $15.00 per tonne ($0.41/bu.) effective March 13, 1989 and brought the price to $190.00 per tonne ($5.17/bu.) for No.1 C.W.A.D. basis Thunder Bay. Adjustment payments for August 1, 1988-March 12, 1989 deliveries were mailed to producers in April 1989.

14 - Saskatchewan minister responsible for Saskatchewan Crop Insurance Corporation Neal Hardy announced enhancements to the **crop insurance** program for 1989. These included a variable price option, a downward coverage adjustment of one step for those with claims in 1988 and, effective August 1, 1989, deduction of Western Grain Stabilization levies from crop insurance claims.

23 - Farm Credit Corporation announced that the **interest rate** on Shared Risk Mortgages would increase from 13.0% to 13.25% and the rate on 5-year fixed term loans would increase from 12.5% to 13.0% for loans approved after March 23, 1989. Interest rates for the 10 and 15-year term loans remained unchanged at 12.75%.

28 - the Canadian Grain Commission (CGC) proposed a revised schedule of **fees** effective August 1, 1989 in order for the CGC to achieve full cost recovery. The CGC announced June 20, 1989 that the average fee increase would be 9.3%. Among the changes were an increase in licence fees for primary elevators (11%) and grain dealers (18%) and a new fee for determining wheat protein content. The CGC also announced that the maximum allowable tariffs for most elevator services would be raised by five percent.

29 - the Federal Government announced its intention to extend the authority of the **Canadian Broiler Hatching Egg Marketing Agency** (CBHEMA) to include the movement of chicks from unregulated provinces into provinces where the marketing is regulated by the CBHEMA.

30 - the Agricultural Stabilization Board announced the details of an **Agricultural Stabilization Act** (ASA) payment totalling $60 million for grain corn, barley, canola and oats marketed in 1987-88 and not eligible under the Western Grain Stabilization Act. Payments for corn were $52 million, barley $7.5 million, canola $0.8 million and oats $60 000. Canola producers had previously received an interim payment of $1.2 million. There was no payment for wheat or soybeans. An announcement of a forthcoming ASA payment was made in November 1988.

- Saskatchewan Finance Minister Gary Lane presented the **1989 Budget** which included: an extension of the mandate of the Agricultural Credit Corporation of Saskatchewan (ACS) to include financing for farmers with off-farm income, refinancing for viable farm operations, financing for the home quarter and long-term financing for first year start-up costs; funding for the $54 million Canada-Saskatchewan Soil Conservation Agreement; and an increase in the fuel tax from 7.0 to 10.0 cents per litre, with a corresponding increase in the fuel tax rebate for personal and for farm use. Mr. Lane also announced a two cent per litre non-rebatable environmental surcharge on leaded fuel purchases effective April 1, 1989.

- March was cold and dry with below normal temperatures on most days and below normal precipitation throughout Saskatchewan. Normal **temperatures** were experienced early in March and on a few days during the last two weeks. Monthly average temperatures ranged from ten degrees below normal in the southeast to six degrees below normal in the northwest. Normal highs range from -4°C to 0°C and normal lows range from -17°C to -11°C. With few exceptions, Saskatchewan received less than 75% of normal March **precipitation** and many locations recorded 30% to 40% of normal accumulations. Normal March precipitation varies from 15 mm in western locations to near 30 mm in the northeast. Most of the reporting stations in the area south of a Shaunavon-Swift Current-Moose Jaw-Carlyle line received normal to above normal precipitation during the **November 1988-March 1989** period. A few isolated locations in west central and in east central Saskatchewan also received normal winter snowfall. However, most of Saskatchewan's agricultural region received from one-half to three-quarters normal winter precipitation. The lack of snow and melting temperatures during the last two days of March resulted in virtually no snow cover south of a line from Kindersley through Hudson Bay. North of the line, snow depth varied from 2 to 17 cm.

April

3 - the Right Hon. Jeanne Sauvè Governor-General read the **Throne Speech** opening the Second Session of the Thirty-fourth Canadian Parliament. Highlights included tax reform to replace the federal sales tax, commitment to reducing interprovincial trade barriers, the establishment of a centre for the international promotion of sustainable development and commitments to limiting the impact of toxic chemicals and improving the quality of water through new regulations and legislation.

5 - Saskatchewan Economic Development and Tourism Minister Joan Duncan announced that West Coast Reductions Ltd. would be constructing a **rendering plant** for inedible meat by-products in Saskatoon.

8 - members of the General Agreement on Tariffs and Trade (GATT) announced an agreement to maintain domestic and export support and protection at existing levels for 1989 and 1990 and to progressively reduce the levels. The countries also agreed to a long-term reform package by the end of December 1990.

21 - Farm Credit Corporation announced that the **interest rate** on Shared Risk Mortgages would increase from 13.25% to 13.75% and the rate on 5-year fixed term loans would increase from 13.0% to 13.25% for loans approved after April 20, 1989. Interest rates for the 10-year and 15-year term loans remained unchanged at 12.75%.

26 - Grains and Oilseeds Minister Charles Mayer announced **1989-90 initial payments** for the base grades of wheat, durum and barley. Initial payments were set at $155.00 per tonne ($4.22/bu.) for No. 1 C.W.R.S. Wheat basis Thunder Bay; $150.00 per tonne ($4.08/bu.) for No. 1 C.W.A.Durum; $85.00 per tonne

($1.85/bu.) for No.1 C.W. Barley and $115.00 per tonne ($2.50/bu.) for Special Select C.W. 2-Row Barley. The initial payments for all grades in each of the pool accounts were announced July 26, 1989.

- Grains and Oilseeds Minister Charles Mayer announced that there would be no interim payment under the **Western Grain Stabilization Program** for the 1988-89 crop year. Mr. Mayer announced November 30, 1989 that the formula in the Western Grain Stabilization Act would not trigger a payment for 1988-89. Gross grain receipts were higher than the previous year while net cash flow was higher than the average for the previous five-year period.

- Federal Finance Minister Michael Wilson presented the **1989 Budget** which included: renegotiating crop insurance cost sharing with the provinces, July 15, 1989 termination of the "At and East" transportation subsidy program and the program which provided payments to western millers to offset charges by railways for "stop-off" to mill grain en route to Thunder Bay, immediate termination of the Branchline Rehabilitation Program and an additional $16 million to the System Improvement Reserve, amendments to the Prairie Grain Advance Payments Act and the Advance Payments for Crops Act to eliminate the interest free provision of the loan guarantees effective August 1, 1989, elimination of the Dairy Special Export Program, no new loans under the Commodity Based Loan Program, an increase in the personal income surtax from 3% to 5% and an additional surtax of 3% on high income individuals effective July 1, 1989, an increase in the federal sales tax rate from 12% to 13.5% for most taxable items effective June 1, 1989, a 1.0 cent per litre increase in the excise tax on unleaded gasoline and a 2.0 cent per litre increase on leaded gasoline effective April 27, 1989 and an additional 1.0 cent per litre increase effective January 1, 1990 on all gasoline, and an extension to December 31, 1990 of the federal sales tax rebate of 3.5 cents per litre for gasoline and diesel fuel used off-highway. Mr. Wilson also announced the introduction of the Goods and Services Tax to replace the federal sales tax effective January 1, 1991.

28 - the National Transportation Agency announced the **rail freight rate** scale for the 1989-90 crop year. The average western freight rate for 1989-90 was set at $30.31 per tonne, up $0.05 per tonne from 1988-89. The producer's share of the statutory grain rate increased $0.62 per tonne from $8.38 per tonne for 1988-89 to $9.00 per tonne for 1989-90. However, the actual average cost to producers increased $1.73 per tonne as the federal government had extended the special grain freight assistance program for 1988-89 and contributed $1.11 per tonne to the $8.38 per tonne producer's share.

- while **temperatures** averaged one to two degrees above normal, below normal temperatures were recorded early in April and at mid-month. Temperatures were well above normal from the 20th through the 23rd. Normal highs range from 8°C to 12°C and normal lows range from -1°C to -5°C. Monthly **precipitation** was variable in location and in amount and with the exception of spots in the southwest, no significant rains were received in April. With few exceptions, the entire area east of a Nipawin-Biggar-Assiniboia line received less than half of normal April precipitation. No measurable rain fell at Outlook during April. Most of the remainder of the province received 55% to 65% of normal precipitation. However, the extreme northwest received three-quarters normal precipitation while isolated locations in the southwest received normal or above normal amounts. Normal April precipitation amounts range from 20 to 40 mm.

May

1 - Saskatchewan Premier Grant Devine announced enhancement of the eligibility criteria for the Agricultural Credit Corporation of Saskatchewan (ACS) **Investment Loan Program.** Corporations, co-operatives and other investor groups are eligible under the program if they are registered in Saskatchewan and operating a farm business in the province. The loan program, introduced in 1988, provides long-term financing for establishing or expanding livestock operations.

3 - the National Tripartite Lamb Stabilization Committee announced a **lamb stabilization** payment of $12.58 per lamb for the December 1988-February 1989 program period.

- the National Tripartite Beef Stabilization Committee announced a **slaughter cattle stabilization** payment of $17.09 per head for January 1989, $3.02 per head for February and that no payment would be made for March. The Committee also announced that no **feeder cattle stabilization** payment would be made for January or February but a payment of $3.96 per head would be made for March 1989.

- the National Tripartite Hog Stabilization Committee announced a **hog stabilization** payment of $38.24 per hog for the January-March 1989 program period.

- **hog stabilization** payments totalling $1.77 million were mailed to participants of the Saskatchewan Hog Assured Returns Program for the January-March 1989 program period.

- the Grain Transportation Agency announced that effective August 1, 1989 grain shippers and the railways would directly negotiate the weekly rail car supply for rye and flax shipments.

5 - the federal government placed broiler hatching eggs and day-old chicks on the **import control list** in support of the Canadian Broiler Hatching Egg Marketing Agency.

- Saskatchewan Public Participation Minister Graham Taylor announced the public sale of the **Central** and **Silver Lake** farms at Green Lake and the **Ile a la Crosse** farm. The government invited proposals for the three government farms in November 1988.

8 - Federal Agriculture Minister Don Mazankowski reintroduced a bill to establish **plant breeders' rights.** The bill was introduced in January 1988 to make it possible for breeders of new plant varieties to hold exclusive rights and receive royalties upon sale of the varieties, but died on the Order Paper when the general election was called.

11 - Saskatchewan minister responsible for SEDCO Joan Duncan and Kenn Propp president of **Harvest Meats Co. Ltd.** announced construction of a new processing plant in Yorkton. The new plant would double the production capacity of the meat processing company.

- Saskatchewan Premier Grant Devine announced a sheep producers plebescite to vote on the question of establishing a **sheep development** plan including the creation of a producer elected and funded board. The results of the June vote, released by Premier Devine July 17, 1989, were that producers voted 71% in favour of a producer elected board. The Saskatchewan Sheep Development Board (SSDB) replaced the Saskatchewan Sheep and Wool Marketing Commission October 26, 1989.

12 - Farm Credit Corporation announced that the interest rate on 5-year fixed term loans would be lowered from 13.25% to 13.0%, effective May 12, 1989. The rate was lowered again, on May 19, 1989, to 12.75%. The rate for Shared Risk Mortgage loans was also lowered, from 13.75% to 13.25%. Interest rates for the 10 and 15-year term loans remained unchanged at 12.75%.

15 - Federal Defence Minister Bill McKnight and Saskatchewan Premier Grant Devine announced a $17 million expansion project of Flexi-Coil Ltd., a farm equipment manufacturer in Saskatoon.

16 - Saskatchewan Premier Grant Devine announced that Saskatchewan had joined the national tripartite stabilization plan for honey.

- Saskatchewan Premier Grant Devine and Kerry Hawkins president of Cargill Limited announced plans for the construction of the Saferco Products Inc. nitrogen fertilizer manufacturing plant at Belle Plaine.

18 - Saskatchewan Rural Development Minister Neal Hardy announced that as a result of drought conditions, leaseholders of provincial grazing and hay lands would be allowed to sublet the land to make grazing or feed available to other livestock producers.

- the Canadian Grain Commission (CGC) announced the 1989-90 producer car allocation policy. With the exception of canola destined for Vancouver a non-refundable fee of $20.00 per car must be included with the application. For non-Board wheat and barley, shippers would receive 10% of the car supply to Thunder Bay. For oats, rye and flax there would be no restrictions for a committed sale and for canola to Vancouver, there would be no restriction for committed export sales.

- Saskatchewan Premier Grant Devine announced an $8.3 million expansion to Prairie Malt Ltd. in Biggar. The expansion would increase the annual malt production capacity from 75 000 tonnes to 105 000 tonnes.

31 - Saskatchewan Justice Minister Bob Andrew introduced a new Homesteads Act to ensure compliance with the Charter of Rights and Freedoms and recognize current land holding practices. Proposed changes included the extension of homestead protection to husbands who are not registered owners of their homes.

- United States Secretary of Agriculture Clayton Yeutter announced the 1990-91 loan rate for wheat at $1.95 per bushel, down 5% from 1989-90.

- cattle stabilization payments totalling $6.32 million were mailed to participants of the Saskatchewan Beef Market Insurance Programs for the January-March 1989 program period.

- May weather was extremely variable with fluctuating temperatures, frost on many nights throughout the month, rainfall ranging from one-half to nearly three times normal and heavy winds causing near zero visibility in blowing dust. May began with near normal temperatures, freezing temperatures at night and widely scattered light showers. Above normal temperatures and wind dominated the weather during the second week. Heaviest winds causing severe dust storms and building damage occurred across most of south and central Saskatchewan on the 10th. The first rain of the month moved into southern Saskatchewan on the 11th and was general across the province through the 14th. Temperatures cooled and rain or showers were received off and on over the next two weeks. Normal temperatures (highs of 16°C to 19°C) and clear skies returned during the final weekend allowing for the resumption of 1989 seeding operations. For the month, most of the province received greater than normal precipitation amounts. The exceptions were the Lloydminster-Meadow Lake area and the southeast corner from Indian Head through Estevan. East central areas also received less than normal rain. Much of central Saskatchewan, from the United States border through Prince Albert received over 75 mm during May. Outlook, which received no rain during April, recorded 95 mm in May. Similar amounts were received at Shaunavon and in Saskatoon while Biggar received over 100 mm during the month. Large areas in the eastern third of the province and along the Alberta border were still dry at month-end. Normal May precipitation amounts range from 30 mm in central Saskatchewan to 55 mm in the extreme southeast.

June

6 - Federal International Trade Minister John Crosbie announced that Canada and the United States agreed on support levels for wheat, barley and oats pursuant to the Canada/U.S. Trade Agreement. Under the agreement Canadian import licences are to be removed if U.S. support levels are less than or equal to Canadian levels. U.S. support levels during 1986 and 1987 for wheat and barley exceeded Canadian levels and therefore import licences would continue to be required. Import permits for oats would no longer be required because U.S. support levels were less than Canadian levels. Although import licences were no longer required, U.S. oats entering Canada for processing must be accompanied by end-use certificates, feed oats must be denatured and seed oats must be accompanied by a seed certificate to ensure that the imports do not enter the Canadian grain marketing system.

9 - Farm Credit Corporation announced that the interest rate on Shared Risk Mortgages would be lowered from 13.25% to 13.0%, the rate for 5-year fixed term loans would be lowered from 12.75% to 12.5% and the rates for the 10 and 15-year term loans would decrease from 12.75% to 12.25% effective June 9, 1989.

29 - Canada Packers Inc. announced that it would build a $1.3 million canola gathering station west of Humboldt at Dixon.

- much of agricultural Saskatchewan recorded normal or above normal temperatures and normal to above normal accumulated rainfall during June. While temperatures were near normal (highs of 20°C to 24°C and lows of 8°C to 10°C) on most days, well above normal was recorded at mid-month and at month-end. For the month, average temperatures were within one degree of normal in most locations. General but light showers were recorded on numerous days throughout the month with fairly general showers and rain in a system which moved through the province during the 23rd - 25th period. Combined with the isolated heavy thunderstorms associated with daytime heating, most of Saskatchewan received above normal (60 to 80 mm) June rainfall. However, in the southeast rainfall was only 65% to 90% of normal and in a large band through west and north central Saskatchewan rainfall was 35% to 85% of normal. Dry conditions in western, central and southeastern regions were stressing crops at month-end. The daytime heating also resulted in violent winds and eight tornados--on the

19th, the 25th and the 30th. Extensive damage to crops, buildings, equipment, trees and livestock herds was reported on the 19th in the northwest at Blaine Lake, at Ridgedale in the northeast and in numerous southern locations including Craven, Katepwa, Corinne, Minton, Odessa and Rockglen. A tornado on the 25th caused damage to buildings in southeast Saskatchewan at Kendall. Strong winds and tornados were also reported in the northwest on the 30th causing extensive damage in Cutknife, on the Poundmaker Reserve and in the Vawn, Medstead, Glaslyn and Paynton areas.

July

14 - Federal Defence Minister Bill McKnight and Herb Swan minister responsible for the Saskatchewan Water Corporation officially opened the **Luck Lake Irrigation Project**. The project, announced in July 1986, provides water for farm irrigation, domestic and livestock use, a Ducks Unlimited marsh and for the villages of Birsay and Lucky Lake.

17 - Federal Agriculture Minister Don Mazankowski and Herb Swan minister responsible for the Saskatchewan Water Corporation announced that **Saskatoon Fresh Pack Potatoes Ltd** was undertaking a $2.4 million expansion to its processing plant.

- The **Agricultural Credit Corporation of Saskatchewan (ACS) Amendment Act**, The Farm Financial Stability Act and The Agriculture Development Fund (ADF) Act received royal assent in the Saskatchewan Legislature. Amendments to **ACS** included debt settlement financing, a Guarantee Vendor Mortgage Program and increased flexibility under the Capital Loan Program. **The Farm Financial Stability Act** consolidated existing legislation and amended and extended programs to include more products. The Agriculture Development Fund Act enabled **ADF** to become a legal entity to provide funds for agricultural and food research, development and demonstration projects.

25 - Farm Credit Corporation announced that the **interest rates** for its loan products would decrease one-quarter of a percent for loans approved after July 25, 1989. The rate for Shared Risk Mortgage Loans was set at 12.75%, the rate for 5-year term loans was set at 12.25% and the rates for 10 and 15-year term loans was set at 12.0%

27 - Federal Agriculture Minister Don Mazankowski announced that the target price for **industrial milk** would be increased from $47.06/hl to $47.45/hl effective the new dairy year, August 1, 1989.

28 - the National Tripartite Lamb Stabilization Committee announced a **lamb stabilization** payment of $9.02 per lamb would be made for the March-May 1989 program period.

- the National Tripartite Beef Stabilization Committee announced a **slaughter cattle stabilization** payment of $44.50 per head for April 1989, $59.83 per head for May and $68.58 for June. The Committee also announced **feeder cattle stabilization** payments of $16.62 per head for April, $23.68 for May and $9.32 for June.

- the National Tripartite Hog Stabilization Committee announced a **hog stabilization** payment of $36.27 per hog for the April-June 1989 program period.

- **exports** of the major grains and oilseeds totalled a below average 18.54 million tonnes in 1988-89 as a result of the 1988 drought which resulted in production of 34.15 million tonnes. Canada exported a record 30.99 million tonnes in 1987-88.

- temperatures averaged one to three degrees above normal and rainfall amounts across most of Saskatchewan were one-half to two-thirds of normal during July. Only isolated locations in eastern and southern Saskatchewan, which received heavy **thundershowers** due to daytime heating, received above normal accumulated rainfall. Normal July rainfall varies from 40 mm in the west to 80 mm in the northeast. Normal **temperatures** with isolated showers on numerous days were recorded during the first half of the month. Temperatures were above normal for most of the remainder of the month and rainfall came in the form of heavy localized rain associated with daytime heating. Fairly general but light showers were reported during the period of the 27th-29th. Heavy wind, rain, hail and tornados were reported throughout the month. Tornados in the Regina area--Peebles, Odessa, Montmartre, Glenavon, Osage--on July 8, in eastern areas--Kamsack, Canora--on the 11th and in south central areas--Balgonie, Lumsden Beach,Condie--on the 29th damaged crops, buildings and equipment. By month-end crop yield expectations were 90% of long-term average.

August

- **hog stabilization** payments totalling $1.35 million were mailed to participants of the Saskatchewan Hog Assured Returns Program for the April-June 1989 program period.

- cattle **stabilization** payments totalling $12.73 million were mailed to participants of the Saskatchewan Beef Market Insurance Programs for the April-June 1989 program period.

- the United States Department of Agriculture announced the 1989-90 preliminary **loan rate** for soybeans at $4.53 per bushel, down $0.24 from 1988-89. The final rate was set at $4.53 in September 1989.

- isolated light showers and normal to above normal temperatures during the first half of August gave way to general showers, rain and cooler temperatures for the second half of the month. **Temperatures** for the month averaged one degree below normal in the north and west and one degree above normal in central locations. Normal daytime highs are 22°C to 27°C. A tornado in the Fleming area damaged buildings and crops on the 17th, heavy hail fell on the 23rd at Hyas and two degrees of frost was recorded at Cote on the 20th. As a result of the general **showers** and rain during the second half of the month August rainfall totals were 25% to 30% above normal for most of Saskatchewan. In the northeast and southwest rainfall was twice normal. Less than normal was received in the northwest, the extreme southeast and in central regions. Normal rainfall varies from 30 mm in central areas to 75 mm in the northwest. The showers and rain during the second half of the month stalled the 1989 harvest at 40% complete.

September

5 - Saskatchewan Premier Grant Devine announced the introduction of the Feed Grain Adjustment Program (**FeedGAP**) effective October 1, 1989 to replace the Livestock Investment Tax Credit and the Livestock Facilities Tax Credit programs. FeedGAP would pay, on a per head basis, $13.00 per tonne for feed grain consumed by cattle, hogs, lambs and game animals. The qualifying livestock must be finished in Saskatchewan and destined for slaughter. The tax credit programs would expire at the end of 1989.

8 - Saskatchewan minister responsible for Saskatchewan Crop Insurance Corporation (SCIC) Neal Hardy announced that a **marketing agent system** would be implemented by SCIC for 1990 to provide direct sales and service to producers.

13 - Saskatchewan Science and Technology Minister Ray Meiklejohn signed a memorandum of understanding committing up to $3.8 million in support of the Canadian **RADARSAT** satellite program.

15 - an international trade panel under the General Agreement on Tariffs and Trade (GATT) ruled against Canada in a dispute with the United States over **import quotas** on ice cream and yogurt. Canada added the products to the Import Control List in 1988.

18 - Saskatchewan minister responsible for SaskPower and SaskEnergy Eric Berntson announced a special **grain drying** policy to assist farmers during the wet harvest conditions. Farmers would be able to temporarily relocate dryers to an adequate source of natural gas or electricity with no installation charge.

19 - Federal Grains and Oilseeds Minister Charles Mayer announced **1989-90 initial payment** increases effective October 5, 1989 for the barley and designated barley pools. The $15.00 per tonne ($0.33/bu.) increase for barley raised the initial payment to $100.00 per tonne ($2.18/bu.) for No. 1 C.W. basis Thunder Bay and the $30.00 per tonne ($0.65/bu.) increase for designated barley raised the initial payment to $145.00 per tonne ($3.16/bu.) for Special Select C.W. 2-Row basis Thunder Bay.

- the Canadian Wheat Board announced **1989-90 initial payment** increases of $10.00 per tonne ($0.27/bu.) for Nos. 1 and 2 C.W. Soft White Spring Wheat. Effective October 5, 1989, the initial payment for No.1 C.W. was $145.00 per tonne ($3.95/bu.) basis Thunder Bay.

29 - the United States Department of Agriculture announced **1990-91 loan rates** down 5% from 1989-90: corn at $1.57 per bu., barley at $1.28 per bu., oats at $0.81 per bu. and rye at $1.33 per bu. The 1990-91 loan rate for wheat was set in May at $1.95 per bu. The 1989-90 loan rate for soybeans was set at $4.53 per bu., down 5% from 1988-89.

- rain and showers during the first half of September continued to delay the Saskatchewan harvest. Harvest resumed at mid-month and with the exception of a disturbance which moved from west to east on the 17th and 18th harvesting continued under near ideal September conditions. By month-end less than one percent, primarily flax, remained to be combined. While the month's **rainfall** was general amounts were extremely variable. As a result, most of the eastern third of the province and locations in southwest and central regions averaged less than normal monthly precipitation while remaining regions received above normal amounts. The area west of a Biggar-Prince Albert line recorded 50% to

140% above normal September precipitation. Normal September precipitation ranges from 30 mm in central areas to 50 mm in the east. Temperatures averaged normal to above normal on most days and resulted in monthly averages of slightly above normal. Frost was reported in eastern areas on the 9th and the first general frost, of 4 degrees, was recorded on the 10th and 11th. The wet weather of the first ten days of September, with 60 percent of the crop unharvested, resulted in below average crop quality in 1989.

October

27 - Farm Credit Corporation announced that the **interest rate** for 5-year fixed term loans and for the 10 and 15-year term loans would decrease one quarter of a percentage point to 12.0% and 11.75%, respectively. The rate on Shared Risk Mortgages would increase from 12.75% to 13.0% as of October 27, 1989.

- the National Tripartite Lamb Stabilization Committee announced a **lamb stabilization** payment of $10.00 per lamb would be made for the June-August 1989 program period.

- the National Tripartite Beef Stabilization Committee announced a **slaughter cattle stabilization** payment of $49.30 per head for July 1989, $10.28 per head for August and $17.35 for September. The Committee also announced that **feeder cattle stabilization** payments would not be made for July or August but a payment of $1.65 per head would be made for September 1989.

- the National Tripartite Hog Stabilization Committee announced a **hog stabilization** payment of $33.14 per hog would be made for the July-September 1989 program period.

- **hog stabilization** payments totalling $0.41 million were mailed to participants of the Saskatchewan Hog Assured Returns Program for the July-September 1989 program period.

- the general rain which moved into the province at the end of September gave way to clear skies and below freezing temperatures on the 2nd and 3rd. Although **temperatures** were below normal on numerous days in October, temperatures were normal or above normal on most days. As a result, temperatures averaged near the October normal highs of 10°C to 12°C and lows of -3°C to +1°C. **Precipitation** was light and scattered until the 13th when showers moved into western Saskatchewan and into eastern areas on the 14th. A general rain was also received in most eastern areas on the 26th and 27th while light snow and rain covered most of the province at month-end. For the month, most of eastern Saskatchewan had received above normal October precipitation but the western half received from 20% (southwest) to 70% (northwest) of normal precipitation. Normal October precipitation is 20 to 25 mm in the east, 20 mm in the southwest and 15 mm in the northwest. At month-end only a light snow cover was reported in northeast locations.

November

1 - Dairy Producers Co-operative Ltd. of Saskatchewan purchased **Manco Dairies** of Manitoba.

1 - Saskatchewan Premier Grant Devine announced the creation of the **Saskatchewan North American Waterfowl Plan Corporation** to co-ordinate the delivery of the North American waterfowl management and conservation plan in Saskatchewan. The first of the project offices was officially opened in Wadena by Saskatchewan Parks and Renewable Resources Minister Lorne Kopelchuk.

3 - the Canadian Wheat Board (CWB) announced **interim payments** of $15.00 per tonne for deliveries into the 1988-89 wheat and designated barley pool accounts. The CWB announced the 1988-89 **final payments** for wheat, durum, barley and designated barley on December 22, 1989. The 1988-89 final payments included $12.14 per tonne ($0.33/bu.) for No. 1 C.W.R.S. Wheat, $14.48 per tonne ($0.39/bu.) for No. 1 C.W.A.Durum, $4.23 per tonne ($0.09/bu.) for No. 1 C.W. Barley and $17.75 per tonne ($0.39/bu.) for Special Select C.W. 2-Row Designated Barley. The final payments were in addition to the interim payments announced in November. The CWB announced the results of the 1988-89 oats pool accounts February 16, 1990. No final payment was made from the regular pool while final payments from the designated pool included $18.90 per tonne ($0.29/bu.) for No. 1 C.W. Designated Oats.

9 - the National Stabilization Committee announced a **honey stabilization** payment of 8.8 cents per pound for the June 1988-May 1989 program period.

17 - Federal Member of Parliament Larry Schneider and Rick Swenson Saskatchewan minister responsible for Saskatchewan Economic Development Corporation announced assistance to S&J Processing Ltd. of Craven to establish a **salad processing plant**.

28 - the Canadian Wheat Board (CWB) announced that it would be returning to producers the carrying charge interest on 1988-89 **producer** car shipments.

- **cattle stabilization** payments totalling $7.41 million were mailed to participants of the Saskatchewan Beef Market Insurance Programs for the July-September 1989 program period.

- **temperatures** fluctuated above and below freezing throughout November but averaged near normal in southern locations and two to three degrees below normal across the north. Normal highs range from -1°C to +3°C in the south and -3°C to -1°C in the north. Light **precipitation** in the form of both rain and snow was reported throughout the month and as a result most of the province's agricultural region recorded precipitation at 20 to 50 percent above normal. Exceptions were the extreme southeast and the extreme northwest. Normal November precipitation is 10 to 15 mm for most of the province and 20 to 25 mm in eastern and northern areas. Above freezing temperatures at month-end resulted in only a light snow cover in most of south and central Saskatchewan and cover of 5 to 10 cm across much of the north.

December

6 - Federal Agriculture Minister Don Mazankowski tabled amendments to the Crop Insurance Act which included raising individual **crop insurance** coverage levels to 90% from 80%, coverage of additional crops, statutory compensation for waterfowl damage and provision for provincial cost-sharing of administration and premium costs. The legislation received Royal Assent March 29, 1990.

8 - Saskatchewan Premier Grant Devine announced an increase in the maximum assistance provided under the Provincial Disaster Assistance Program. The maximum level of **disaster assistance** for uninsurable property damage was increased to $30 000 from $5 000.

11 - Canadian agriculture ministers signed a memorandum of understanding to address reducing **interprovincial trade barriers** in the movement of agricultural and food products.

- Canadian agriculture ministers agreed at the National Agri-Food Policy Conference in Ottawa to the establishment of seven government/industry **task forces** to review Canadian agricultural and food policy and issues. The seven task forces included Market Development and Value-Added (Competitiveness), Farm Finance and Management, Safety Nets, Supply Management, Transportation, Food Safety and Sustainable Agriculture.

14 - Federal Agriculture Minister Don Mazankowski announced a $6 million **special assistance** program for the Atlantic livestock sector.

15 - amendments to the Advance Payments for Crops Act (APCA) and the Prairie Grain Advance Payments Act (PGAPA) received Royal Assent. Amendments to the **cash advance** legislation included removal of the interest-free provision and increased limits in the amount of the advance.

27 - Federal Agriculture Minister Don Mazankowski announced that the ban on the import of **honey bees** would be extended until December 31, 1991. The ban was imposed in 1987 to protect the Canadian industry from infestation of varroa mites from the United States.

- Farm Credit Corporation announced that the **interest rate** for 5-year term loans would increase from 12.0% to 12.25% and the rates for 10 and 15-year term loans would increase from 11.75% to 12.0% for loans approved after December 27, 1989. The rate for Shared Risk Mortgages remained at 13.0%.

- CP Rail provided public notice of application to offer **incentive shipping** rates in co-operation with 22 grain shippers for the 1990-91 crop year.

- CN provided public notice of application to offer **incentive shipping** rates in co-operation with 32 grain shippers for the 1990-91 crop year.

- December **temperatures** varied from above normal to record breaking lows. Temperatures were normal or above normal until the second week when cold air moved into the province and resulted in a two week cold snap. Record breaking low temperatures were recorded during the third week. Temperatures of -35°C to -45°C broke on the 22nd and temperatures were above normal for the rest of the month. Most of Saskatchewan received below normal **precipitation** during December. Central and northern locations received rain early in the month and again near month-end. General snows were received on a few days but with the exception of a few central and northwest areas accumulations were light and well below normal. Normal December precipitation ranges from 15 mm in the south to 25 mm in the northwest. At month-end only northern agricultural regions had more than 10 cm of snow cover.

*Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

**Capacity is measured in tonnes of wheat storage capacity.

*The operating period of the Western Grain Stabilization Program was changed from a calendar year to a crop year, effective August 1, 1983. Producer levy collected for 1983-84 is the period January 1, 1984 to July 31, 1984. This procedure was required to permit the transition from a calendar year to a crop year calculation.

Table 131 - Metric Conversion Factors Used

1 kilogram = 2.2046 pounds
1 tonne = 1.1023 tons
= 22.0464 hundredweight
= 36.7437 bushels of wheat or durum
= 64.8418 bushels of oats
= 45.9296 bushels of barley
= 39.3683 bushels of rye or flaxseed
= 44.0925 bushels of canola
1 litre = .21997 gallons
1 millimetre = .03937 inches
1 kilolitre of milk (3.5% b.f.) = 22.6761 hundredweight
